Step 4: Go to the location in which your Assetto Corsa Track files are stored. For steam users it should be located at C:\Program Files (x86)\Steam\steamapps\common\ assettocorsa\content\tracks . (That address can be placed directly into browser to take you directly to the files) Folder should contain lots of tracks. The folder in c:\ Documents\assettocorsa is rarely used.

Step 5: Right click and Paste the copied folder into the tracks folder

	ks_vallelunga	1/25/2020 8:20 AM	File folder			

Please note: Upon initial extraction and opening folder, the folder must be only 1 layer deep before getting to files. Example \Folder>Folder>Files will not work it must be \Folder>Files. If the track does not show up in the Assetto Corsa track list in Sim, this is most likely the issue. Please E-mail <u>simautox@gmail.com</u> for any questions, concerns or requests.

Good Luck and Sim On!
